What started as a hobby to roast and brew the perfect cup of coffee has developed into a thriving business. With a successful line of cafés and coffee beans, Jumping Bean Coffee's "Service Before Self" mantra has seen the business develop while staying connected to the community. With a focus on Fair Trade and organic coffees, as well as reducing Carbon Emissions wherever possible, you have a truly guilt-free cup of coffee!

- **STANDARDS THAT MATTER:** Our East Coast Roast, Deep Water Dark and Lighthouse Roast are fairtrade organic. Fairtrade changes the way trade works through better prices, decent working conditions and a fairer deal for farmers and workers in developing countries. Organic, defined simply, is food produced without using chemical fertilizers, pesticides, or other artificial agents.
- **ECO2 ROAST:** For every 1lb. (454 g) of ECO2 Roast coffee we produce, you save the world about 1lb of carbon waste. Even our single serve pods are 100% compostable.
- **EXQUISITE FLAVOUR:** Our standards are high for flavour too. Jeff LeDrew was always a coffee lover and connoisseur and brings that experienced palate to our bean selection.

OUR CORE CONSUMERS

Jumping Bean Coffee is for coffee lovers that value sustainability and fairtrade along with great flavour. Our range features beans and blends from light roast to ultra dark, providing something for all tastes.

OUR PRODUCTS
